Re: Public Notice of Draft National Pollutant Discharge Elimination System Permit
City of Plummer Wastewater Treatment Plant
NPDES Permit No.: ID0022781

Dear Ms. Freeburg:

The purpose of this letter is to request that the Plummer Public Library make the enclosed draft National Pollutant Discharge Elimination System (NPDES) permit and the fact sheet which explains the basis for the conditions in the draft permit available for the public until the public notice expiration date listed on the enclosed fact sheet. We have enclosed two copies of the documents, so that you may keep one copy on file and make the other available for check-out, if you choose. The U.S. Environmental Protection Agency will provide notice that these documents are available in the local newspaper.

By making these documents available to your patrons, you will be providing access to these documents for those who do not have access to the internet and who cannot travel to the Idaho Department of Environmental Quality office in Lewiston or the EPA's Idaho Operations Office in Boise. The EPA appreciates your cooperation in making this information available to all those who might take an interest in it. Please note that these documents can also be downloaded from the EPA Region 10 NPDES web page at <http://epa.gov/r10earth/waterpermits.htm>.

If you have any questions about this letter or the permit and fact sheet, please contact Brian Nickel of my staff at 206-553-6251 or via e-mail at Nickel.Brian@epa.gov.

Sincerely,

Michael J. Lidgard, Manager
NPDES Permits Unit
